Eco-Friendly Project RULES

- You will be required to submit an abstract and a project description paper detailing your project as part of the application process.
- The abstract should be less than 500 words and should include the goal, experiments, and the results.
- The project description paper should include: title, student names, school, city and country, abstract, introduction, goal of the project, methods and experiments, results and discussions, conclusion, and references.
- At the Fair: You will present your project as a poster presentation during GREEN INSPIRATION. You are allowed to bring demos or prototypes to present as part of your presentation.
- The size of your poster can not be bigger than 40 (h) x 60 (w) inches (100(h) x 150(w) cm) size. It is recommended to be between 30-38 (h) x 48-54 (w) inches (75-95 cm x 125-130 cm). GREEN INSPIRATION will provide foam poster boards in size of 40x60 inches.
- The poster should include at least the following sections: introduction, goal, results and discussion, conclusion, and references.
- A table will be provided for every project . You have to arrange necessary electrical instruments required but we can provide electrical connection on request

- Students are advised (not required) to bring multiple copies of their final research paper to distribute to curious viewers.
- Students should come to the competition with pre-printed materials to prepare their posters.
- At the Fair: The following items will not be allowed to display: microbial cultures or fungi (live or dead); displays of live animals, preserved vertebrate animals, whether in whole or part (this includes humans); open or concealed flames, matches, or lighters; hazardous chemicals; highly combustible solids, fluids, or gases; sharp items (syringes, needles, knives); controlled substances; and radioactive materials.
- Each Team may present only one project. A maximum of two students may present a project.
- In all aspects of projects, the participants must maintain integrity.
- Participants must avoid any misconduct or fraud, such as falsifying data or records, and piracy or plagiarism (presenting the work of another person's as one's own).
- All competitors and supervisors have to communicate in English well enough to present their projects.
- There is no limit how many projects may be submitted from same school/organization. Also, there is no limit how many projects from one school can be finalist.
- All projects from same school or organization should be submitted under one application login in order to control communication and projects more efficiently.
- Projects which do not submit requested required information on time in the requested format shall be disqualified.
- The panels of judges evaluate the projects in accordance with the following criteria:
 - i. To what extent is the project technologically applicable and likely to be realised?
 - ii. To what extent is it visionary and/or innovative?
 - iii. Is the project well structured and clearly communicated?
 - iv. To what extent is the project likely to have a positive environmental or energy impact?
